

CORONA VIRUS SAFETY

We honor all official requirements to close non-essential services during peak threats.

PROTECTING OUR STORE

We have installed a facial recognition thermal scanner to monitor the temperature of staff and patrons prior to entrance.

We continually disinfect all frequently touched surfaces, and some uncommon areas. Our doors, door knobs, showcases, clothing racks, changing room walls, furniture, and display counters are sanitized with a commercial grade, alcohol-based disinfectant.

We think like a kid, tackling areas they have visited, and zones they may have idly handled. We work discreetly, so our guests feel welcomed and safe.

Our washrooms are sanitized after all observed use, and at varying times throughout the work day.

Our service counters are sanitized after each transaction.

We use aerosol disinfectants periodically to sanitize the air.

MONITORING OUR HEALTH

We monitor staff for Covid19 symptoms.

We remain vigilant around customers for symptoms.

STRENGTHENING OUR SYSTEMS

We offer curbside and delivery services.

We are developing virtual tools to stay connected and protected. We've switched our in-store Family Talks to Webinars. We are producing seasonal catalogues to browse-and-buy on your time and terms.

Currently, we offer several payment options you can make at a distance. Call in a payment, opt for curbside concierge services using our portable card reader, or shop online using Paypal. Coming soon, our secure e-portal for hassle-free debit/credit card payments.

We look forward to connecting at Sandbox, a safe, creative place for your kids to grow with us.
